Education

Rajiv Gandhi Institute of Petroleum Technology (INI), Jais, Amethi B.Tech in Information Technology - CGPA: 7.59	2024 – 2028
ISC Class XII - 86.75% Computer Applications (Java): 96%	2023
ICSE Class X - 91.4% Computer Applications (Java): 98%	2021

Technical Skills

- **AI/ML:** Python, TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Feature Engineering, Transfer Learning
- **Programming:** Java, Python, C++, C, SQL
- **Core CS:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Theory of Computation
- **Development:** Android SDK, Flutter, Room Database, SQLite, Streamlit, API Integration
- **Data Analytics:** Power BI, Spreadsheet Modeling, Data Analysis, Data Visualization
- **Tools:** Git, GitHub, VS Code, IntelliJ IDEA, Google Colab

Experience

- Summer Research Intern, Deep Learning Lab** May 2026 – July 2026
Indian Institute of Information Technology Allahabad (IIITA)
- Developed Java-based Android modules using system-level application data for behavioral analysis as part of a cybersecurity research project.
 - Designed modular feature extraction components to transform application behavior and system attributes into machine learning-ready data.
 - Collaborated with faculty members to evaluate detection techniques and refine the application's analysis pipeline.
- McKinsey Forward Program** May 2026 – July 2026
McKinsey & Company
- Completed a 10-week professional development program focused on structured problem-solving, communication, adaptability, relationship building, and digital and AI essentials.
- Co-Head, Maker's Club** August 2025 – July 2026
Science and Technology Council, RGIPT
- Led a 3-member core team and mentored 20+ juniors while organizing technical workshops and hands-on sessions.
 - Coordinated and hosted an Intellectual Property Rights (IPR) workshop attended by 150+ participants and managed technical event execution.

Projects

- Android Behavioral Detection and Threat Scoring System (ABDTS)**
GitHub APK
- Engineered a modular Android application using Java, Android SDK, Flutter, Room Database and SQLite to collect application security and behavioral features.
 - Extracted permissions, privileges, usage patterns and application attributes into structured, machine learning-ready datasets for downstream threat prediction.
- Optimization Techniques in Logistic Regression (From Scratch)**
Google Colab
- Implemented Logistic Regression from scratch in Python and experimentally compared Gradient Descent, Stochastic GD, Mini-Batch GD, Momentum, RMSProp and Adam, analyzing convergence and optimization performance.
- Food Delivery Time Prediction using Deep Learning**
Deployed App
- Built an end-to-end TensorFlow/Keras delivery time prediction application on 104,603 records with time-based feature engineering.
 - Developed a Scikit-learn preprocessing pipeline with imputation, StandardScaler and OneHotEncoder, producing 90 features; trained a feedforward neural network achieving 11.27-minute MAE and 0.248 R^2 .

Achievements

- **Amazon ML Summer School 2026** - Finalist; advanced to the final Selection Test.
- **AlgoUniversity Technology Fellowship (ATF) 2025** - Top 8% nationwide in Stage 1 among 250,000 participants; advanced to Stage 2.
- **Adobe University Hackathon 2026** - Advanced to the Final Round; results pending.
- **HMEL Energy Quest 3.0** - Advanced to the Final Round.
- **Smart India Hackathon 2025** - Top 20 Teams in the RGIPT Internal Hackathon.
- **First Place** - Flameless Hot Air Balloon Workshop conducted by IIT Bombay at RGIPT.
